Mountain View, CA 94040

5 years of software experience, before that 3 years in startup product management. I've pushed technology for as long as I can remember. Starting with animations on my family's Mac in elementary, then digital cameras in middle school then robotics in high school, and now app development professionally. I love building magic for the masses. Javascript, Bash, and SQL are my core software languages, and I can write many if not most other languages as well. I've also dipped my toes in a variety of skills from welding to electronics to AI, I enjoy learning new things. At Uber I became known for web app design, fast prototyping, and proficiency in leading small fast acting groups of engineers (2-10). Outside of work I like to drive my Miata, play *Magic: The Gathering*, skateboard, electronics projects, and drawing.

Work Experience

Fullstack Senior Software Engineer L5a - **Uber** (Sep 2018 - October 2019)

Fullstack Software Engineer L4 - **Uber** (Sep 2016 - October 2019)

Junior Web Engineer - **Plangrid** (Dec 2014 - Aug 2016)

Junior Fullstack Product Engineer - **Showvine** (May 2014 - Aug 2014)

Founder and Entrepreneurship - **Open Robotics** (Aug 2013 - April 2014)

IT and Fulfillment and Product Management - **iFixit** (Feb 2010 - Oct 2012)

Certificates

Eagle Scout - **Boy Scouts** (2009)

High School Graduation (Emphasis on STEM) - **Monte Vista** (2009)

3 semesters including 1 CS class - **Cuesta College** (2011)

Machine Learning 10 week online course by Andrew Ng - **Coursera** (2014)
