Mountain View, CA 94040

5 years of software experience, before that 3 years in product management. Most recently a Senior Software Engineer (L5a) at Uber. Where I did mobile and web app development. I love building magic for the masses, mixing many technologies. **Javascript, Bash, and SQL are my core software languages**, but I'm a generalist engineer and I can and have written most other major languages and frameworks as well. I can also do graphic and mechanical design and machining and construction and electronics and robotics and AI and devops, I enjoy learning new technical things. At Uber I did web app design, fast prototyping, and was proficient in coordinating small fast acting groups of engineers (2-10) to build production systems and teach other engineers new technologies. Outside of work I like to drive my Miata, play *Magic: The Gathering*, skateboard, and draw.

Work Experience

Fullstack Senior Software Engineer L5a - **Uber** (Sep 2018 - October 2019)
Fullstack Software Engineer L4 - **Uber** (3 years total, Sep 2016 - Sep 2018 at this rank)
Junior Web Engineer - **Plangrid** (Dec 2014 - Aug 2016)
Junior Web Engineer - **Showvine** (May 2014 - Aug 2014)
Founder - **Open Robotics** (Aug 2013 - April 2014)
IT and Fulfillment and Product Management - **iFixit** (Feb 2010 - Oct 2012)

Certificates

Eagle Scout - **Boy Scouts** (2009)
High School Graduation (Emphasis on STEM) - **Monte Vista** (2009)
3 semesters - **Cuesta College** (2011)
Machine Learning 10 week online course by Andrew Ng - **Coursera** (2014)
